

adopt a float

# Adopt a float

An international educational program

# The program

## Adopting an underwater robot

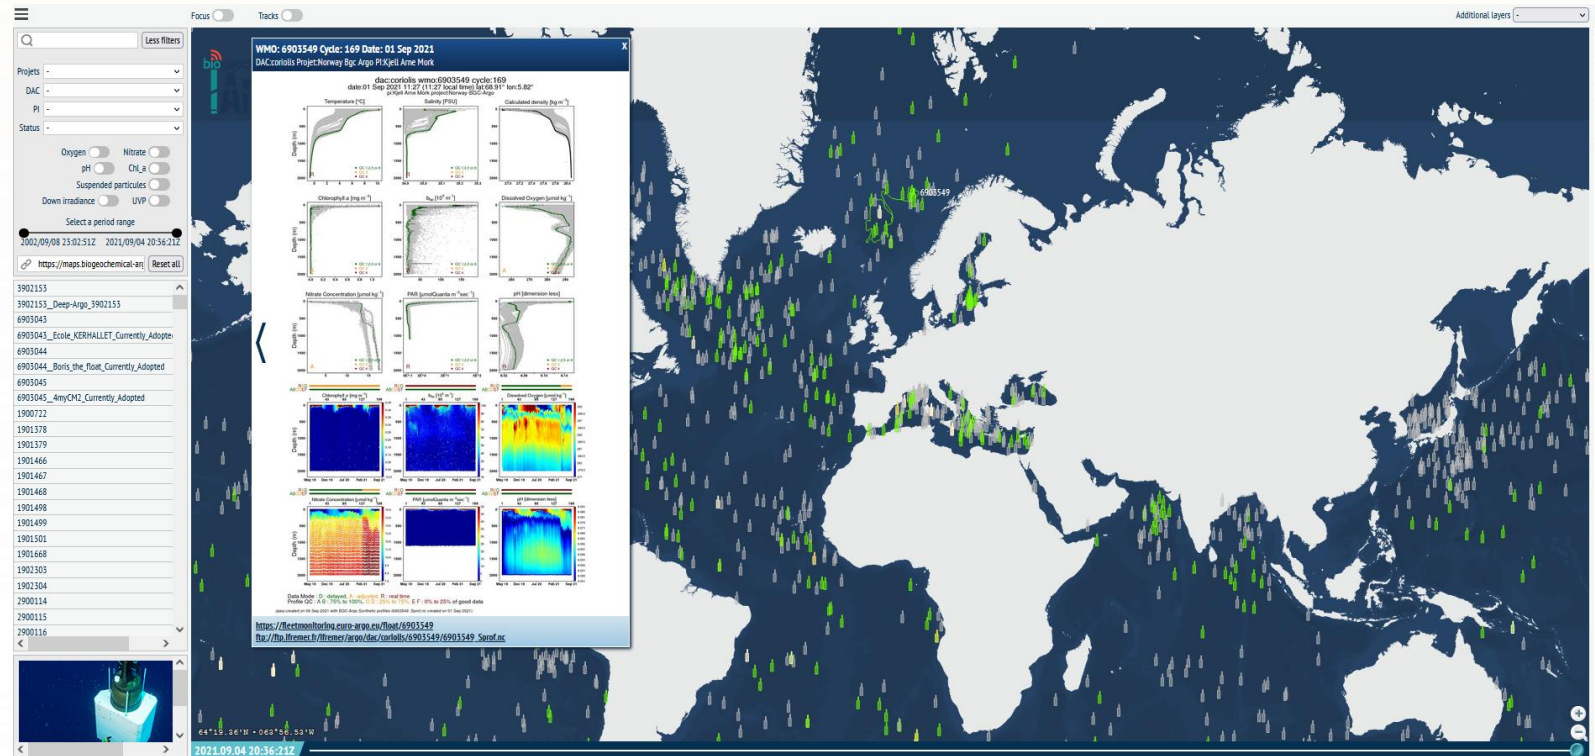

- **Discovering marine sciences** and the importance to study it to better understand and protect our **Ocean**
- **All educational level** (kindergarten → ocean students) **& around the world**
- **Supporting teachers & searchers in Ocean Education**
- **Classrooms sessions** : in-class or virtual
- **Different Tools & Resources** : Dashboard (padlet), posters, [interactive map](#)...

# Floats & data

<https://maps.biogeochemical-argo.com/adoptafloat/>

- **Handbook** to easily access, understand & exploit data
- **Different uses for different school levels & subjects**
  - **Sciences** : graphics & raw data
  - **Arts**
  - **Geography**
  - **French/English classes**

# From 2010 until today...

- **Ocean Literacy engagement inside & outside classrooms**
- **Participation of classes from all over the world** : metropolitan France, French Polynesia, New-Caledonia, Italy, UK, Austria, South Africa, United Arab Emirates...

➔ **More & more : x2 from 2020 to 2021**

- **User-friendly interactive map**
- Catalogue with **diversification** of topics including **virtual sessions**
- « **Inspiring project** » in EU Blue Schools Handbook
- **Partnering with Ifremer** for educational purposes
- Upcoming : **new website** in progress & **strengthening evaluation** processes

# Throwback to 2020-2021

<https://vimeo.com/560801672> (French version)

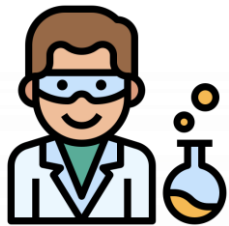

# Ocean Education : How do we support...

## ...The teachers

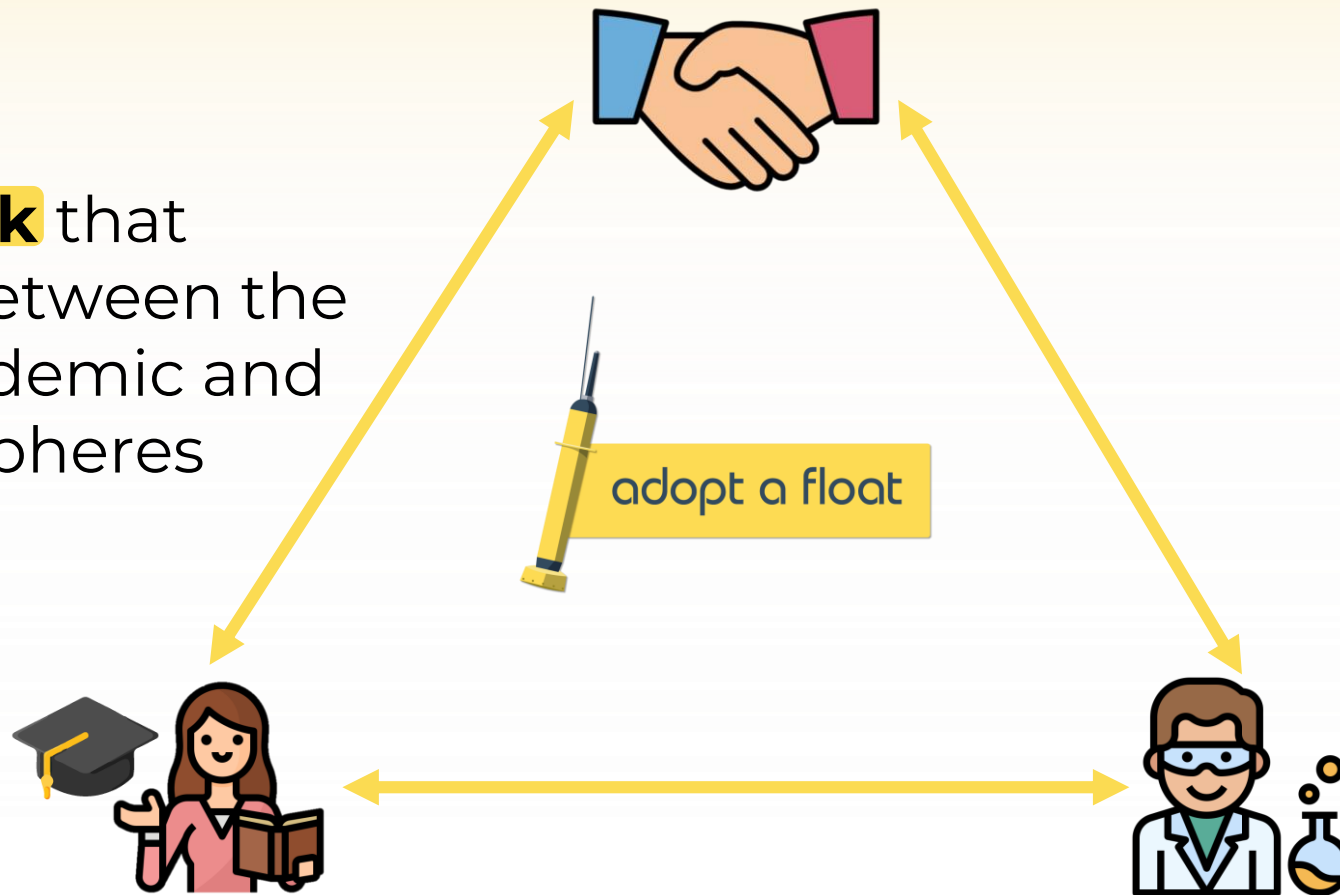

- Online **resources** for autonomous work in class
- **Individual follow-up & advices** : contact with outreach officer & researchers + science mentor
- **Teachers meeting** : 1/month to strengthen their scientific knowledge & inspire activities in their classes

## ...The researchers

- Opportunities to **engage with a young public**
- **Resources** : slides, experiments...
- **Meetings & discussions** to develop sessions adapted to young audiences
- **Pairs** with outreach officer to facilitate and simplify the transfer of knowledge
- **Training opportunities** for Ocean Literacy & educational components

A real **network** that favors **links** between the scientific, academic and educational spheres
